Think in new dimensions

REHAU ARTEVO: our new sustainable window, with excellent thermo-acoustic properties, that's unbeatable in terms of safety and design.

Generous and individually designed window surfaces have never been in such demand as they are today. As a large-scale design element, they enhance the living space in a modern way and maximise natural light.

REHAU ARTEVO redefines the limits of what is possible in terms of size, production efficiency, sustainability, originality and design, thus enabling a completely new living experience. This creates architectural freedom and ensures contemporary results.

- Floor-to-ceiling windows with heights of up to 2.6m
- Up to 40% lighter than comparative systems
- Reduced transport and installation costs
- Achieves Passivhaus standards with top performance ratings for thermal and sound insulation and security
- Low maintenance, with the easy-clean, inward opening, tilt and turn function
- The most sustainable premium system in the industry, its patent pending solution improves thermal performance, whilst simplifying manufacture and reduces material consumption
- Can be fitted with REHAU's window RFID tagging system.
